1. Line Graphs (Trends Over Time)

- **Tense**:
  - **Past Tense**: When describing trends that occurred entirely in the past.
  - Subject + Verb (Past Form) + (Adverb) + Object
    - *Example*: "The population **increased** steadily between 2000 and 2010."

  - **Present Perfect**: When describing changes from the past up to the present.
  - Subject + Have/Has + Past Participle + Object
    - *Example*: "The number of houses **has increased** dramatically since 1990 to present."

  - **Future Tense**: When the graph includes future projections.
  - Subject + Will + Verb (Base Form) + Object

    - *Example*: "The population **is expected/predicted to increase** by 2030."

    "The population will reach 2M by 2030."

2. Bar Charts (Comparisons)

- **Tense**:
  - **Present Simple**: When making general comparisons or when the data is not time-bound. (year is not given)
  - Subject + Verb (Base Form) + (Adverb) + Object
    - *Example*: "Country A **has** the highest population."

  - **Past Tense**: When comparing data points in the past.
  - Subject + Verb (Past Form) + (Adverb) + Object

    - *Example*: "In 2000, Company B **produced** more cars than Company A."

3. Pie Charts (Proportions)

- **Tense**:
  - **Present Simple**: When describing data at the present.
  - Subject + Verb (Base Form) + Object
    - *Example*: " Currently, the average income **is** $50,000."
    - "In 2024, the population of City A **is** 1.5 million."

- **Past Simple**: When the pie chart represents data from the past.
- Subject + Verb (Past Form) + Object
  - *Example*: "In 1990, food and beverages **comprised** 30% of household expenditure."

4. Tables (Specific Values and Comparisons)

- **Tense**:
  - **Present Simple**: For current or general information.
  - : Subject + Verb (Base Form) + Object
    - *Example*: "The table **shows** the GDP of four countries."

  - **Past Simple**: For data specific to past years.
  - Subject + Verb (Past Form) + Object
    - *Example*: "In 2015, the unemployment rate **was** 5%."

  - **Present Perfect**: When discussing changes up to the present.
  - Subject + Have/Has + Past Participle + Object
    - *Example*: "The population **has grown** by 2 million since 2010."

5. Mixed Charts (Multiple Data Types)

- **Tense**:
  - **Mixed**: Use different tenses depending on the data. Often, you'll use a combination of Present Simple, Past Simple, and Present Perfect.
- **Formula**:
  - **Mixed**: Adapt the structure based on what you describe (e.g., a trend in one chart and a proportion in another).
    - *Example*: "The bar chart **shows** the number of students in 2010, while the line graph **illustrates** the trend from 2000 to 2020."

6. Processes/Diagrams (Steps or Stages)

- **Tense**:
  - **Present Simple**: Used to describe introduction and overview in a process.
- **Formula**:
  - **Present Simple**: Subject + Verb (Base Form) + Object

        - *Example*: "The process **begins** with the collection of raw materials and **ends** with the packaging of the finished product." (introduction)

- **Present Simple Tense:** Used to describe facts, routines, and generally accepted truths.
    - **Structure:** Subject + is/are + past participle(v3)
    - **Example Sentences:**

1. **Raw materials are collected** and then **processed** to produce the final product.
    - Here, the passive voice ("are collected" and "are processed") is commonly used because the focus is on the process rather than who performs the action.
2. **Next**, the mixture **is heated** in a furnace at a high temperature.
    - Again, the passive voice is used to describe the process.

Summary of Tenses:

- **Present Simple**: Used for general statements, comparisons, proportions, and processes.
- **Past Simple**: Used for data that occurred entirely in the past.
- **Present Perfect**: Used to describe changes from the past up to the present.
- **Future Tense**: Used when describing predictions or projections in the data.
